

DIVERS ALERT NETWORK COURSES AT ADEX 2008

A MUST FOR KEEN DIVERS & DIVE INSTRUCTORS

DAN Asia-Pacific will be attending ADEX 2008. The show will be held at SUNTEC International Convention Centre in Singapore from 18-20 April. At this year's show, DAN AP will have a stand, enabling interested divers to find out about DAN membership, and purchase DAN oxygen gear and other DAN products. DAN AP will also be presenting a variety of relatively new training programs, offering training from basic level to Instructor. We also plan to offer a free DAN Dive Safety Seminar in conjunction with the Singapore Navy on Saturday afternoon.

Courses will include:

The **DAN Automated External Defibrillators (AED) Provider** is a 4-hr course that trains anyone with a previous CPR qualification in the use of an Automated External Defibrillator (AED). AEDs are an important aid in the management of cardiac arrest and often make the key difference between life and death.

The **DAN On-Site Neurological Assessment for Divers Provider** course is a 4-hour training program available to DAN Oxygen Providers, or approved equivalents. It provides training assessing neurological sign/symptoms of decompression illness and certain other injuries in the field.

The **DAN Oxygen Instructor (Level 1) Course / Update**. This course trains a Scuba Instructor (or Assistant Instructor with certain agencies) to teach the DAN Oxygen Provider program. It is a one day course and is a must for all scuba instructors. Candidates will also need to gain a DAN Oxygen Provider Certification prior to accreditation. Out of status DAN Oxygen Instructor can attend the afternoon session to upgrade their instructor status.

The **DAN Diving Medicine & Resuscitation Course** involves further training in physiology, diving medicine, accident management and resuscitation. Successful participants become qualified to teach the DAN CPR Course (BLS Pro), and if already a Level 1 DAN Oxygen Instructor, can upgrade to a Level 2 Instructor. All diving instructors are encouraged to attend as it provides valuable insights and updates on the latest information of diving accident management and resuscitation, including discussion and practice with the new CPR protocols.
