

Information Requirements for Sponsor Applicants

DAN AP Sponsors are organisations that provide an *annual* donation to DAN. One of the benefits, for approved organisations, is the ability to retail a short-term TravelAssist policy that covers the diver for Emergency Evacuation for a period 30-days at a cost of AUD\$16 per person. The program is only available to residents/Nationals from outside the Asia-Pacific region. The product is quick and simple to access, adding to its appeal. In addition, the short-term coverage can easily be built into your diving packages to provide your dive operation with a significant competitive advantage.

DAN Sponsor applicants who are looking to retail the 30-Day TravelAssist Program must provide the following information. We request that you provide as much detail as possible to allow us to make an informed decision.

1. **Location.** Please advise of your specific location incorporating distance to the nearest chamber, distance to the nearest airport and information as to whether the airport is open at night.

Please also provide information regarding the various dive sites visited and their distance from land.

2. **Onboard Oxygen Facilities.** Please provide details of the oxygen provisions available on board your dive boat/s. How many oxygen units are available on each boat? How long would the available oxygen supply last?
3. **First Aid Equipment.** What equipment is available onboard each dive boat?
4. **Trained Staff.** What training do the onboard staff members have in terms of First Aid and Oxygen Provision? Please identify the number of people with training on each dive excursion and their level of training.
5. **Transport.** What means of transport does your operation have available to get a diver to the chamber and/or airport? Is the transport available 24/7?

Thank you.

As a dive safety organisation it is important that we consider the above factors in determining the suitability of dive businesses retailing the short-term product.
